

## Vacancy – eMobility Consultant

**Job Type:** 32-40 hours per week

**Work experience:** 2-5 years

**Travel:** On a regular basis, and stimulated!

**Location:** Emmapark 14, The Hague, The Netherlands

### Position Description

As an eMobility Consultant you will work on projects that directly impact global sustainability and contribute to the Sustainable Development Goals for clients located all over the globe, with a specific focus on Latin America, the Caribbean and East-Africa. You will collaborate across borders, work directly with clients, develop innovative solutions and build lasting relationships. Engaging with diverse cultures, you will gain valuable cross-cultural experience. Together with local stakeholders, you share your eMobility experience, transform the current transport and energy landscape and have sustainable impact. You assure continuation of the local transformation after a project is finalised. Transferring knowledge is an important part of your work.

### Key Responsibilities

Engage in consulting assignments, offering expert advice and support.

Develop analytical reports, whitepapers, market analyses, and presentations for our clients and the NTCS GreenBee team.

Support with project management, workshops and training in planning, alignment and development of reports, presentations and materials.

Creation and refinement of proposals and business development activities.

### In Practice

You support the ministry of energy and transport in an East-African country by developing a masterplan for the implementation of charging infrastructure on a country-wide scale. You do this with a multi-disciplinary team of international and local experts.

You support a Caribbean utility in positioning them as a charging point operator. You investigate the trends in the country, map stakeholder interests, and define a strategy together with the management team of the utility.

You support in developing a proposal as a response to an online tender together with our tender team. You define an approach, describe the activities, and contribute to project cost calculations.

### Requirements

- 2-5 years of experience in a relevant field for eMobility (transport, energy, environmental, technology, government) in a consulting, analytical or policy role
- Willingness to work and travel internationally
- Strong interpersonal skills for effective collaboration with diverse teams and clients
- Experience with preparing presentations in PowerPoint and analysis in Excel or other tools
- Creativity and growth-oriented mindset
- Fluent in English; proficiency in Dutch, Spanish, French or Papiamentu is a plus

## Company Description

NTCS GreenBee is a dedicated eMobility consulting firm, focusing on the full value chain from electric vehicle to charger and battery. Our projects are primarily located in emerging markets, from the Caribbean and Latin America to East-Africa and India. We are working with an experienced core team and an extended group of experts to accelerate the electrification of transport worldwide.

Most of our clients are governments, utility companies or businesses, looking to develop sustainable transport solutions and prepare for electric transport. They often seek support in defining, amongst others, market models, business propositions, roadmaps, regulation, and procurement standards. We support them with expert consulting, training, and project management. As this is a young and promising market, we have the ambition to extend our services and clients. We embrace creativity and encourage fresh ideas. Your voice matters here. Our dynamic team is based upon collaboration, growth, enjoying what we do and a positive mindset.

NTCS GreenBee is growing, and you can grow with us, developing your eMobility expertise and competencies. You can develop as an eMobility specialist, as a consultant, and project manager. GreenBee is part of the NTCS family, where we actively collaborate and look for cross-sectoral opportunities.

## How to apply

Interested? We invite you to submit your resume, along with a cover letter detailing your motivation, experience and interest in the eMobility industry, to [roland.ferwerda@ntcsgreenbee.com](mailto:roland.ferwerda@ntcsgreenbee.com). Please reference “Consultant - eMobility” in the subject line. *Women are especially encouraged to apply.*
