

Vacancy - Energy Consultant

Job Type: 32-40 hours per week

Work experience: 2-5 years

Travel: On a regular basis and stimulated!

Location: Emmapark 14, The Hague, The Netherlands

Position Description

As Energy Consultant you will work on projects for Caribbean energy companies, regulators, and government organisations. You will collaborate across borders, work directly with clients, solve real-world challenges, and build lasting relationships. Engaging with diverse cultures, you will gain valuable cross-cultural experience. Together with local stakeholders, you will transform the current energy landscape and have sustainable impact. Transferring knowledge is an important part of your work. You assure continuation of the local transformation after a project is finalised.

Key Responsibilities

Engage in consulting assignments, offering expert advice and support to our global clients.

Develop analytical reports, market analyses, whitepapers, and presentations for our clients and the NTCS Energy team.

Support with project management, workshops and training in planning, alignment and development of reports, presentations and materials.

Creation and refinement of proposals and business development activities.

In Practice

You support a Caribbean utility in reviewing their communication network or IT architecture. You visit the company and during the visit you host various workshops with a multi-disciplinary team of NTCS Energy consultants. Together you capture the current situation and challenges, and you develop a roadmap of projects that will guide the utility in achieving its business goals.

You develop, finetune, and present a hot topic in the energy domain at a conference for utilities and open conversations with managers at the conference about this topic.

You support in developing a proposal as a response to an online tender together with our tender team. You define an approach, describe the activities, and contribute to project cost calculations.

Requirements

- 2-5 years of experience in energy consultancy, energy sector analysis, or energy policy
- Willingness to work internationally and travel
- Strong interpersonal skills for effective collaboration with diverse teams and clients.
- Experience with preparing presentations in PowerPoint and analysis in Excel or other tools
- Creativity and growth-oriented mindset
- Fluent in English; proficiency in Dutch, Spanish, French or Papiamentu is a plus

Company Description

NTCS Energy is an innovative, client-centric, and quality-driven consultancy firm specialised in supporting utilities, regulators, governments, and other entities in the energy sector throughout the Caribbean and the Americas. We offer a comprehensive range of consultancy, interim, and recruitment services. We work on a strategic, tactical, and operational level and support for every element of the energy value chain: from generation to distribution, procurement, engineering, IT, HR, and finance. Building on the legacy of Dutch and other European organisations that served as global energy transition front-runners, we deliver exceptional expertise and skills. Our goal is to contribute to the delivery of more affordable, reliable, and sustainable energy via innovative services and tested business models.

NTCS Energy is growing, and you can grow with us, while developing your energy expertise and competencies. You can develop yourself a specialist, as a consultant, and project manager. NTCS Energy is part of the NTCS family, where we actively collaborate and look for cross-sectoral opportunities.

How to apply

Interested? We invite you to submit your resume, along with a cover letter detailing your motivation, experience and interest in the Energy sector, to mark.boeren@ntcs.nl. Please reference “Consultant - Energy” in the subject line. *Women are especially encouraged to apply.*
